

Suitable for handling small and unstable products (loose or packaged) in a linear transfer from the head of one conveyor to the next one.

INDUSTRIES

- Bottling and canning
- Food filling
- Container manufacturing
- Pharmaceutical
- Paper/cardboard
- Consumer goods

APPLICATIONS

- Depalletizer
- Mass conveyors
- Accumulation tables
- Infeed packaging machines
- Packaged product convey
- Product handling within packaging machine (narrow chains)

REGINA MODULAR BELTS

REGINA offers the most complete range of 1/2" pitch belts available on the market, all with 8,7 mm thickness, having the following technical and geometrical features:

- Top surface: solid, rubberized and flush grid.
- Bottom surface: flat (available for metric standard width only) or round.
- Width standard: metric (85 mm width increments) or imperial (3" width increments).
- Tracking guide: belts available with or without tracking guide, depending on the series.

The complete range of REGINA 1/2" pitch belts, together with their geometrical features and available materials is shown in the table below.
